

## Technology/Internet Intern

### The Company

DaCast is an early stage technology company based in San Francisco and Paris that aims to become a leader in the monetization of online video streaming. We have built the first all-in-one platform to easily broadcast video and monetize content through pay-per-view, subscription or advertising. Our team of experienced developers is responsible for designing and developing the DaCast technology platform. . At the forefront of innovation, we offer our customers the most advanced solutions. In addition, our presence in the heart of Silicon Valley ensures our team develops and uses the best technologies to create solutions that will make DaCast a leading player in video monetization.

### The Mission

- You participate in all phases of the project, design, implementation, test, production as well as maintenance
- You are proficient and hands-on with PHP5 and Zend framework

Intern positions are available in Paris (France) and San Francisco (US).

Attractive compensation packages and benefits are based on experience.

### Desired Job profile

- You have a first experience in PHP Zend development (intern, personal project...)
- You have at least a basic knowledge of server side programming and relational databases, including MySQL
- You have a front end programming experience, using HTML, CSS, JavaScript, AJAX, UML
- You know web standards and usability criteria

DaCast is a high growth environment with the opportunity to learn quickly, take on new responsibilities and continually upgrade your skill sets in the short / medium term.

### Technical Environment

Drupal and Zend Framework, Mysql, Oracle, SQL Server, Apache 2, CURL, XML, JQuery, PHP, script shell, Javascript, CDN like Akamai, EdgeCast, Limelight
